

* baseline = visit closest to anchor within [−24, 0] mo

Abbreviations

APOE = apolipoprotein E
BMI = body-mass index
DBS = deep brain stimulation
GBA = glucocerebrosidase
GDS = Geriatric Depression Scale
GEE = generalised estimating equations
GLASSO = graphical LASSO

IPW = inverse-probability weights
KM = Kaplan-Meier
LEDD = levodopa-equivalent daily dose
LMM = linear mixed model
NHY = Hoehn & Yahr stage
NP1PAIN = MDS-UPDRS Part I item 9 (pain)
PD = Parkinson disease

PD-PRS = PD polygenic risk score
PPMI = Parkinson's Progression Markers Initiative
PSM = propensity-score matching
SAA = α-synuclein seeding amplification assay
STAI = State-Trait Anxiety Inventory
TOST = two one-sided tests
UPDRS = MDS-UPDRS
